DANNER Modern Firefighter 8in NMT Black

SKU: 18051

Description

The Modern Firefighter 8-inch NMT Black boots feature a non-insulated design for versatile performance in varying conditions. A non-metallic composite safety toe provides ASTM F2413-certified protection against impact and compression while preventing heat or cold transfer and avoiding metal detectors. The semi-locking side zipper allows for quick entry and exits while maintaining a secure fit during wear. With an 8-inch height and a weight of 80 oz per pair, these boots deliver reliable protection, convenience, and support for demanding work environments.

Features

These boots feature a 100% waterproof Danner Dry membrane that keeps feet dry while allowing moisture to escape for all-day comfort. Comprehensive protection includes resistance to blood-borne pathogens, flames, heat, cuts, punctures, slips, abrasion, corrosion, impact, compression, electrical hazards, and sharp objects underfoot, meeting ASTM F1671 and ASTM F2413 standards. A lightweight nylon shank reduces foot fatigue and provides underfoot stability on rough terrain. The removable OrthoLite footbed delivers cushioning, arch support, breathability, and heat dissipation. The Vibram S587 Fire & Ice outsole offers oil- and slip-resistant traction in both extreme cold and hot conditions.

Specifications

Weight	80 oz per pair
Height	8in
Color	Black
Insulation	N/A
Closure	Zip-Up
Toe Protection	Composite Toe (NMT)
Liner	Danner Dry
Protection	Electrical Hazard Certified (EH), Puncture Resistant Midsole (PR), Body Fluid Borne Pathogen Resistant, waterproof
Shank	Nylon
Footbed	OrthoLite
Outsole	Vibram S587 Fire & Ice
Traction	N/A
